(Continued on Page 4)

National FFA officers visited Lancaster County Wednesday. The National FFA recognized New Holland Division of Sperry Rand with a "Gold Sponsor's Award" for the firm's sponsorship of the FFA award program through the National FFA Foundation. Among those visiting New Holland's operations center Wednesday *are: front, left to right, Tim Burke, Iowa, National FFA* president; Paul Gray, national FFA executive secretary; Kevin Hall, Keymar, Md., North Atlantic Region FFA vice president; J. C. Fink, state FFA advisor. Back, Ken Ibach, New Holland computer operations supervisor; Phil Johnson, Nebraska, Central Region FFA vice president; Doyle O. Waybright, Gettysburg, Pennsylvania FFA *president, and Dan Reuwee, national FFA information director.*

Max Smith Honored for 35 Years of Service

Max Smith, Lancaster County ag agent, was honored for his 35 years of service to the local farm community at a special program at the annual Red Rose 4-H Baby Beef and Lamb Club annual banquet at the Farm and Home Center Thursday night.

The program featured the well known Floyd "Dutch" Bucher, Reamstown, county agent who hired Smith in 1937.

Bucher, who noted it has been "about 27 years since I've faced such a fine audience," recalled that Smith early in his career complained about not having enough to do so the 4-H work was turned over the the former Washington Countain "lock, stock and barrel." Bucher added, "And you all know what a fine job he has done."

Several others also spoke about the important role Smith has played in Lancaster County 4-H work. They included: Miss Debbie Kreider, 4-H'er who gave a humorous account of Smith's concern about top quality care of show animals; Stanley Musselman, National Central Bank farm representative, who emphasized Smith's role as a representative of agriculture to the business community and his role in getting the Farm and Home Center built, Arthur Rohrer and Mylin Good.

Fred Linton, Quarryville RD2, Red Rose 4-H Club leader, was master of ceremonies to the award program. Based on research by club leaders, he said Smith has helped to buy, sell and feed some 3,500 steers worth $1.4 million and 1,200 sheep worth $60,000 Smith also has attended and conducted about 7,280 meetings "as near as we could figure " His 4-H'ers have had 11 grand champion steers at the Farm Show

In expressing his appreciation, Smith particularly noted "help of good leaders all the way through" and "the trail blazing of some of the men like Dutch Bucher "

He added, "I guess I'll get turned out to pasture too one of these days. I hope I'll wear half as well as that Dutch Bucher "

Smith also said that working with the youth "has been the highlight of my career" and "this is what has kept me young "

Gary Dean, 4-H'er, presented a humorous farewell to 19 club

(Continued on Page 15)

Two veterans of the local farm scene greet each other Thursday night. They're "Dutch" Bucher, left, long time Lancaster County ag agent, and Max Smith, current ag agent, who was honored last night for his 35 years of Extension work in Lancaster County.

Max Smith, Lancaster County ag agent, was honored Thursday night for 35 years of Extension work in Lancaster County See story on page 1.

In the 1960's, the pullet growing industry in Southeastern Pennsylvania nearly died out, because of a dread disease known as Marek's. But a Stevens RD1 pullet operation survived and, now that Marek's is under control with vaccine, is expanding, perhaps signalling the return of pullet growing here. See story on Daniel E. Wenger's conversion to a cage operation on page 16.

3 Poultry Meetings Planned

A series of three educational meetings for poultrymen have been scheduled jointly by the Lancaster County Poultry Association and the Cooperative Extension Service

The meeting dates are February 10, February 24 and March 9, all beginning at 7 30 p m at the Farm and Home Center, Lancaster

Topic of the February 10 meeting is "Producing and Marketing Quality Eggs " Paul Hess Jr, marketing manager of the Plain and Fancy Egg Ranch, Inc , will speak on "Marketing Aspects for Marketing Quality Eggs" and Herbert Jordan, Penn State University poultry specialist, will speak on "Management Aspects for Producing Quality Eggs " A summary on "Management-Marketing as Partners" will also be given

The February 24 meeting will cover "Pennsylvania Standards for Eggs" and how these standards relate to "Federal Standards Under the Egg Products Inspection Act " Also scheduled is a discussion of "The Economics of Egg Shell Damage.

The March 9 meeting will deal with "The Public Image of the Egg and What the Industry Can Do to Improve It" and a review of the "Market Order Check Off and the Fowl Adjustment Act."

Lancaster Farming this week expands its Hog Prices coverage with the introduction of hog market reports from Indianapolis, St. Louis and Peoria.

Last week, we began separating the hog market portions from our regular reports under a single Hog Prices heading for easy reading by our hog producers. The three markets introduced this week will give an overview of what's happening in Western hog markets to supplement information previously available about local hog markets.

We continue to welcome suggestions for further improvement of our market coverage

Omaha Cattle

Thursday, February 3

Compared with last weeks close, late trading on slaughter steers 75c - 1.00 lower than previous week and heifers 50 - 75c lower. Cows weak after early advance erased. Bulls strong to 50c higher. Feeder cattle and calves strong to 50c higher.

Four day receipts 18,800 as compared 18,700 previous week and 22,600 a year ago. Slaughter steers approximately 42 per cent, general finish fairly attractive with moderate supply High-Choice. Cows 9 per cent and feeders 9 per cent, with supplies of feeders largely fleshy two-way kinds. The upward spiral in fed cattle prices brought to an abrput halt as a result of sharply declining carcass prices and sluggish movement of finished product. The major decline came on a shortened midweek supply as buyers took a determined stand to establish some sort of reasonable ratio between current live prices and carcass realizations. Despite storm conditions most interests competitive for only minimum numbers to meet immediate requirements. Muddy cattle quite prevalent and those carrying substantial amount of mud usually sold around 50c below same grade relatively clean animals.

Average cost slaughter steers first three days 36.10 average weight 1,121 pounds as compared 36.15 and 1,127 pounds previous week and 31.65 and 1,163 pounds a year ago.

Market Steers

Steers - 20 loads early High-Choice and Prime U.S. 3-4,10911348 pounds, 37.40-38.00; late 1108-1286, 36.65-37.25: Choice 2-4, 975-1275, 35.50-36.50; Mixed Good and Choice, 950-1225, 34.50-35.50; Good, 31.75-34.50; Holsteins 2-3 31.75-32.25; Standard and Low-Good. 30.50-31.50.

Heifers - 10 loads early High-Choice and Prime U.S. 2-4, 877-1065 pounds, 36.10-36.65; late 3-4, 965-1131, 35.75-36.00; Choice 2-4,825-1025, 34.50-35.50; Mixed Good and Choice, 800-975, 33.50-34.50; Good, 29.00-33.50; Standard and Good, 27.00-29.00.

Cows - Utility and Commercial, 22.00-24.00; Canner and Cutter, 19.00-22.50.

Bulls - Utility, Commercial and Good, 26.00-28.50; Commercial, 29.00-30.00; Cutter and Low-Utility, 24.00-26.00.

Feeder Steers

Prices strong to 50c higher under good early demand. Supplies mainly fleshy two-way steers which moved readily early but under narrowed demand at midweek as a reflection of declining slaughter prices. Outshipments of 1,600 head compared 1,200 previous week.

Steers - Two loads Choice, 468-528 pounds, 41.00-41.75; 8 loads, 1025-1050, 36.00-36.50; High-Good and Choice, 800-1097, 35.00-36.00; Good, 763, 34.50.

Heifers-

Heifers - Choice, 763-789 pounds, 34.50-35.75.

Agrico, Geigy Hold Management Meeting

About 170 farmers attended a Crop Management meeting at Blue Ball Fire Hall Thursday night. The meeting was sponsored by Agrico Chemical Company and Geigy Chemical Company.

The meeting featured a presentation by John Beideman, Geigy sales representative, on control of problem weeds in corn.

Beideman particularly zeroed in on the need to control and how to control fall panicum, nutsedge, and quackgrass.

Also speaking was Mitchell Thompson, regional agronomist for Agrico, on the importance of following soil test recommendations. He stressed the importance of liming and proper rates of fertilization in order to get maximum crop yields.

The top door prize was awarded to Sam U. Stoltzfus, Gap RD1, 480 pounds of Agrico corn starter fertilizer.

The meeting was conducted by Frank D. Blest, district Agrico manager for Lancaster County.

Peoria Cattle

Thursday, February 3

Slaughter steer and heifer prices advanced on Monday, began to weaken on Tuesday and declined sharply on Wednesday. Despite Wednesdays price decline, bulk sales slaughter steers and heifers ended mostly 50 lower than the previous week. Cows were generally 50 higher. Bulls closed steady to strong. Supply consisted mainly of High Good and Choice slaughter steers and heifers, with several loads mixed Choice to Prime slaughter steers and heifers; Balance of receipts consigned mainly of cows.

Receipts this week 5,100; last week 5,500; last year 1,900.

No-Fault Insurance Is Topic

"No Fault Auto Insurance" will be the subject of the third educational meeting being sponsored by the Farm and Home Foundation of Lancaster County at 7:30 p.m. Tuesday evening, February 8 in the auditorium of the Farm and Home Center, 1383 Arcadia Road, Lancaster.

The meeting will feature a panel of four authorities in the auto insurance field to present all sides of this controversial subject. Panel members include: Roy Miller, Insurance Company of America; Frank Roda, Lancaster Bar Association; Marvin E. Miller, Representative to State Assembly, and Chester Heim, legisltive director of the Pennsylvania Farmers Association. Each of the panel members will give a short talk about No-Fault Insurance and then the meeting will be opened for questions and general discussion.

Melvin R. Stoltzfus, president of the Farm and Home Foundation, invites all interested folks to attend this meeting without further notice. It is the feeling of the Foundation that this subject is of such importance that a public service will be rendered if all phases of the proposed plan are brought to the attention of Lancaster Countians.

Dr. Emmett Robertson, chairman of the Educational Committee of the Farm and Home Foundation, will serve as panel moderator. Additional members of the Educational Committee are: Noah W. Kreider Sr, Manheim RD3; John W. Sangrey, Conestoga RD2, and Max Smith

From Local Ag Teachers:

Thoughts in Passing

Editor's Note: This is the second of many articles in a special column written by various agriculture teachers in our service area. The articles are designed to be of interest to and have educational value for all farm people. At the same time, they offer an opportunity for the farm community to become better acquainted with the teachers and for the teachers to express their own interest in the local agricultural community.

By Michael J. Burton,
Penn Manor H. S.
Vocational Ag Teacher

Most people associated with vocational agriculture know what a supervised experience project is, but may not know that it is outdated

An agriculture student raises a crop or animal that is his own and keeps all necessary records on it. He does this so that when he graduates he will have the necessary foundation, stock and capital, along with management skills to start farming

Supervised farming projects like these do not meet the needs of today's agriculture Only five per cent of the nation's work force is actively engaged in farming, but 40 per cent are employed by the vast agriculture industry

So the supervised farming project is not doing its job if it prepares all these students to enter farming, and not agri-industry.

To meet the changing needs of agriculture, vocational educators had to revamp their supervised experience program. The result is the supervised work-experience program. It places a student in an approved local business under close supervision of the agriculture teacher, the employers, and his parents

Here the student is exposed to as many different phases of the business as possible. Thus, when the student graduates, he will know how the entire business operates This knowledge, along with his agriculture training, will make him a valuable employee.

The supervised work-experience program can be used by the student two ways He can work in an approved agri-business all through high school earning money, and possibly entering that business at a more advanced position after graduation; or he can carry a supervised farming project while in high school and go out on work-experience as a senior.

Under work-experience type program the student is exposed to the business that he selects over a period of six to ten weeks. During this time, he changes jobs within that business three or more times to obtain a general outlook of the whole business.

For example, he may enter a farm machinery dealership. The first two weeks he may work in the repair shop. The next two he spends with the field serviceman, and finally two more weeks with a salesman and in the office. This gives him an understanding an an appreciation of the whole farm machinery business.

Now that both programs have been briefly explained, some may question the value of having students spend school time earning money or acquiring capital to start farming.

However, the supervised experience programs (farming and work experience) do more than provide a student with money, livestock, and experience They give a student a chance to explore the many facets of agriculture firsthand. He is exposed to many situations which help develop him as a person and improve his chances to succeed in life. Some of these opportunities are:

—Developing responsibility: getting up every day to feed his animal or to go to work.

Michael J. Burton

—Making decisions: which bull to use for breeding or whether the tractor needs overhauling.

—Importance of keeping records: whether he makes a profit or loss from his steer, how he takes inventory.

—Analyzing records: pounds feed per 100 pounds gain, cost per bushel of corn produced.

—Managing money: budgeting his paycheck, investing in production inputs.

—Exploring agriculture; looking for careers in both agri-business and in farming.

—Learning skills: milking cows, servicing machinery, judging livestock, etc.

This small sampling of experience shows the value of supervised farming program and the supervised work-experience program. Alone, or in combination, they provide meaning and relevance to education.

At a time when youth is demanding that education be relevant, the new supervised work-experience program helps to prepare students for a career in today's modern agriculture.

A Registered Holstein cow owned by Robert L. Weaver, Strasburg RD1, completed the highest lactation. Laura produced 24,177 pounds of milk, 964 pounds of butterfat with a 4.0 percent test in 290 days. Second high lactation was completed by a Registered Holstein cow owned by Nathan E Stoltzfus, Gap RD2. Geraldine produced 20,036 pounds of milk, 879 pounds of butterfat with a 4.4 percent test in 305 days

The herd of John S. Yost, Kinzers RD1, had the highest daily butterfat average This herd of 38.5 Registered Holstein cows averaged 46.4 pounds of milk, 2.01 pounds of butterfat with a 4.3 percent test. The herd of Curtis E. Akers, Quarryville RD1, placed second. This herd of 55.5 Registered and Grade Holstein cows averaged 47.9 pounds of milk, 1.87 pounds of butterfat with a 3.9 percent test.

Facts for Dairymen

by N. Alan Bair, Assistant County Agricultural Agent

Recently the Red Rose Dairy Herd Improvement Association held its annual meeting to honor and recognize the high producing herds and individual cows in Lancaster County with 19,368 cows on test averaging 12,574 pounds milk and 488 pounds fat. This county produces a lot of milk from a lot of cows.

We are told that some of the best milk producing cows in the world are owned by Pennsylvania dairy farmers, but they also may have some of the poorest.

It is estimated that one-third of the more than 700,000 cows that are kept for dairy purposes in Pennsylvania do not produce enough milk yearly to return a profit on the feed and labor they require. Any herd, regardless of size or condition, would be more profitable if the lowest producers were culled from it. Looking at it from a housing standpoint only, it would make a lot of sense to cull the bottom few cows rather than going to the expense of adding a few stalls to add a few cows.

A herd of uniformly good cows cannot be developed easily or quickly, but the average production of any herd can be improved gradually by effective culling, proper feeding and careful selection of breeding stock. No big financial investment is necessary. We should only be concerned with careful planning and management, and a determination to have a good herd.

In order to cull, feed and breed intelligently, and dairyman must have records of production and feed consumption of every cow in his herd, year after year.

Realizing that dairymen are individuals, as well as cows are individuals, each with their own personalities and prejudices, there is no substitute for actual records. Guesses and estimates may serve for a time, but worthwhile improvement is seldom possible without records.

There are record keeping systems available to all dairymen in varying forms to suit the varied needs of the producer. The three basic systems from Penn State that are currently available are the Standard DHIA, Alternate AM-PM, and Owner-Sampler.

The system used is not important. The payoff comes with the use of the records.

xxxxx

Calf raising problems generally come to a head this time of year.

Many times problems arise when well known procedures are overlooked or forgotten.

If you find you are having problems raising calves this winter, review the "basics" and apply them to your management situation.

Be sure your future herd replacements are born in a clean environment. Cleaning means removing all traces of manure and bedding, scrubbing down walls and floors with hot detergents or using a steam jenny, and then using a good disinfectant. Many times the cow's own tie stall is a better bet than a maternity pen that is impossible to clean.

Give the calf colostrum as soon as possible. It is extremely important that calves get colostrum early. They lose their ability to

Facts For

(Continued from Page 8)

absorb the natural protection in this first milk rapidly after the first 12 hours. Be sure they get their first meal by nursing a clean teat, or better yet, from a clean pail.

Treat the naval cord as soon as possible. Cut off the cord at about four to six inches in length and dip the remaining stump of the cord in a sanitizer or disinfectant.

Prevent stress on the baby calf. Common sense tells us to avoid the stresses of chilling, overfeeding, exposure to improper ventilation and general filth, but we often find these situations.

Don't overlook the obvious and pay attention to details in raising your replacements. Remember, they are your future herd.

Help Us Serve You

If your organization didn't make our farm calendar this week, it's not because we don't like you or your organization.

We may have missed it in the rush. Or maybe you forgot to tell us.

Either way, we'd like to extend our farm community service to you.

To get on the Farm Calendar, remind us by calling 394-3047 or 626-2191 or by writing to Lancaster Farming, 22 E. Main St., Lititz, Pa. 17543. And help us serve you better.

"The Challenge of the Future"

IS THE THEME OF

7th ANNUAL SOUTHEASTERN DAIRY CONFERENCE

TUESDAY, FEBRUARY 15, 1972

9:30 a.m. - 3:30 p.m. at Guernsey Barn
Route 30 East, Lancaster, Pa.

(Snow date: February 16)

SPEAKER WILL BE OBIE SNYDER,
of Singing Brook Farm, Bedford County, Pa.

YOU, YOUR FAMILY, AND FELLOW DAIRYMEN ARE INVITED!

Some Trends in Farming

Looking through our mail recently, we noticed that some things have been changing over the past year.

For instance, a year ago, farmers were in the midst of a rising cost situation which included very high feed costs. At the same time, livestock prices were down. The combination was putting a severe squeeze on many farmers.

Now, farmers are facing the pleasant prospect of lower feed costs and relatively high livestock prices. It's the kind of situation which is easy to live with.

But farmers know from experience not to get carried away with delight when things look good We note, for instance, the continual increase in the price of feeder cattle. We think some farmers should begin to ask themselves what might happen if they pay high prices for feeder stock and the market drops.

Our reports indicate that a buildup of livestock numbers has been taking place. Sooner or later this should result in pressure on prices. We suspect that these pressures will be delayed because of the pickup in the general economy which will spur demand. This pickup in demand could keep livestock prices high for many months longer than some forecasts are indicating.

But we also notice some reports on the consumer side complaining about record high retail meat prices. Farmers should remain alert to pressures in this direction.

It seems that some of our so-called friends who complain the loudest when the farmer is getting squeezed economically also complain the loudest when things are going a little better and the farmer is making some money.

The one dark spot in the farm picture continues to be the egg industry. Spurred on by the very high egg prices in late 1969 and early 1970, the industry went on an expansionary binge which was certain to result in disaster The disaster has been on a scale which was to be expected. Some forecasts are now indicating that things may begin to pick up in the second half of 1972, but this is far from certain. The industry as a whole still has not made the determination to make the small percentage of cutback in production which is necessary to bring prices up

Reports from local industrymen suggest that reduced mortality from control of Merek's has probably played a much bigger role in the length of the price depression than was previously suspected. It seems that Merek's not only took a big toll in terms of bird losses, but also in terms of reduced rate of lay and high rate of losses through cracks and egg shell damage. Solving the Merek's problem in the midst of the price depression meant that a much sharper cutback in numbers of birds had to be made than would ordinarily be necessary to stop a market glut The cutback wasn't quite big enough and solving the Merek's problem may have been the biggest reason

Unlike egg producers, pork producers responded very rapidly in 1971 to a market glut The result was that below cost of production prices for pork lasted only a short time. With pork producers generally indicating continued restraint, the immediate outlook for hog producers is very good.

Milk prices? Well, that's a tough one. Our reports indicate that there's some overproduction, which in the short run should indicate a larger percentage of milk diverted into class II uses and a lower blend price for producers. If this overproduction continues too long, there will be pressures on prices, too.

But the national war chest for milk promotion is growing by leaps and bounds and should continue to grow. If promotion is as successful as its proponents expect, promotion should soon begin to make progress toward at least reducing the rate of decline in per capita milk consumption—and hopefully bring increases.

Statewide, out bet, despite assurances to the contrary from Harrisburg, is that elimination of retail milk price setting will benefit consumers at the expense of the farmer. The farmer may not suffer immediately if Milk Control is eliminated, but out guess is that retailers won't take significantly reduced profit margins long without squeezing the farmer.

We also notice indications that the farm community will come under increasing pressures on quality control and chemical use. This includes stiffer regulations on use of fertilizers, pesticides and various chemicals, including antibiotics. This type of thing will almost certainly lead to higher operating costs Farmers should be aware of these trends and be prepared to readjust their thinking both in terms of the type of materials used and how they're applied. At the same time, it's important to keep an eye on the cost problem.

It's our observation that these types of pressures will force even greater specialization in farming for several reasons. For one, new rules and greater know-how in use of chemicals will require greater care and more knowhow, maybe special training.

It will be increasingly impossible for farmers to keep up with these new rules and requirements in several fields. It may be necessary to devote more attention to a smaller number of projects in order to get the job done right.

One alternative will be to turn over the worry and know-how involved with this type of thing to agri-business firms which can provide the service or to custom applicators which can be expected to grow in number and importance.

As always in farming, things are changing fast and an awareness of the direction of the changes is important.

Where There's Smoke

Smoking and matches rank as the number one cause of building fires, reports the National Fire Protection Association.

Make sure you have plenty of large ashtrays in your house. And don't smoke in bed, warns the Penn State University Cooperative Extension Service Farm and Home Safety Committee.

BLOOMSBURG, PA, PRESS "A leading journal for pharmacists, 'American Druggist' reports that 'make it do, use it up, do without' has become an outmoded philosophy. It has been replaced with the new view 'use it once and throw it away'. According to the publication, disposable products are often cheaper and healthier. It lists a number of such items and concludes, 'A disposable hairbrush is also under consideration.' This comes as a surprise. Looking at the shocking number of juvenile delinquency cases we had concluded that Momand Pop had disposed of the hairbrush about ten years ago."

To Be Careful With Snowmobiles

Weather conditions have permitted the use of snowmobiles during the past week and we are aware of the disregard for priviate property in their use. I'd like to remind the owners of these pleasure vehicles that the permission of the land owner should be secured before the mobile is operated on that piece of land. Just how much damage a snowmobile does to a small grain field or to a permanent sod is not clearly known; however, other people do not have the right to drive over your land without permission. As these machines get more numerous and if snowfall permits their more extensive use, owners of these machines should be interested in running on land with the owner's permission; don't trespass and be liable for damages and injuries.

To Service Farm Machinery

The spring months are approaching and when the weather permits many pieces of farm machinery will swing into action. It is good management to have every piece in good working condition in order to prevent costly delays. Now is the time to get the machinery serviced and ready. Many machinery dealers welcome the work during the winter months and may give some discounts. Farmers doing their own repairs will be able to spend more time and do a more through job if they can plan to do it when the pressure of outside work is not as great. Machinery is expensive and deserves being kept in good condition.

To Be Careful With Antibiotics

Again we remind all livestock producers that medicines and drugs used properly and carefully can render a great service; however, the trend may be toward the too extensive use of some of these materials and then a resistance is developed by the organism. Also, with the use of most drugs and medicines there is a regulation concerning the withholding period of milk flow, or certain length of tiome before being sold for slaughter. We urge that all producers recognize the importance of these regulations and follow them carefully. There are record blanks to be used for keeping accurate records of the administering of all types of drugs and medicines. We urge good record keeping in order to have some protection against a claim of mis-use.

To Pay By Check

When checks are used to pay expenses instead of paying cash, there is some record of the transaction. We are aware of the habit of some farmers paying cash for purchases rather than using their checking account. I think this is a doubtful practice and one that is not included in good farm record keeping and good farm management. Discounts may still be obtained by paying promptly be check as well as with cash. Permanent records of payments and contributions become more important with many new taxes and regulations. The check book and the resulting cancelled check gives the needed record of both small and large transactions.

THE BIBLE SPEAKS

Internat onal Un form Sunday School Lessons

BY LAWRENCE W. ALTHOUSE

CHRIST AND THE CITY

Lesson for February 6, 1972

Background Scripture Luke 13 31-35, 19 28-48
Devotional Reading Psalms 122

There is a painting by the French artist, Paul Hippolyte Flandrin, entitled "Christ Mourns over the City" It is, of course, an interpretation of Luke 13 31-35 and 19 28-28, two occasions when Christ expressed deep concern over the city of Jerusalem and its unreceptivity to God's messengers The figure of Jesus dominates the whole right side of the painting He stands looking over the city and, although we cannot see his face clearly, it is obvious that his head is bowed in sadness

Rev. Althouse

Jesus weeps for the city

It is the left side of the painting that surprises, for we find that the sprawling expanse beneath Jesus is not Jerusalem, but one of our contemporary cities It could be New York, Chicago, Atlanta, Los Angeles—it could be your town. There is, to be sure, a large cathedral or church in the center foreground, but it is dark; no light comes from it. The city itself is crowded, dingy, and wreathed in smoke. It is definitely a modern city.

The intent of the artist is plain. Christ still mourns over the city, he is saying, but not just Jerusalem Christ mourns over all cities where ignorance, greed, and hatred have dimmed or extinguished the light of God. The two occasions in the gospel of Luke, then, are very relevant for today.

Today, as then, Jesus meets with the same response: "Teacher, rebuke your disciples!" (19: 39) People in the cities are just as hostile and resistant to the claims of the Gospel today as they were when Jesus mourned over Jerusalem. They don't want to hear prophets; they don't want to hear God's voice, they don't want to know what he wants of them They are still violent in their response to God's spokesmen.

Jesus acts for the city

Once again, Jesus says to the cities, open your eyes, and weeps because there is so little response to his voice The problem of the cities is the problem of man: his spiritual blindness It is not that he cannot see, but that he will not

Once again, the result is likely to be the same if you will not wake up and see, you will be destroyed . "because you did not know the time of your visitation" (9.44). So Jesus was not content to weep for the city; to make the people wake up and see he did the most significant thing he could do he gave his own life so that the city might know.

Once again this is what is required if our own cities are to escape their destruction. It will not be enough for us to weep and wring our hands over them. We must be willing, like him, to offer nothing less than ourselves.

Plans Discussed by Farm Women Board

Members of the Lancaster County Farm Women executive board met Tuesday at the home of Mrs Dale Hiestand, Bainbridge RD1 Mrs Harry Shonk served as cohostess

Announcement was made that the Spring Rally of Farm Women will be held May 10 at Seven Springs Resort, Somerset County A turkey dinner will be served at the affair Those planning to attend should contact Mrs Kenneth Ross, Fridens RD2, before April 8

In other business, members were reminded that all Farm Women Societies which have not as yet sent their donations for the Farm and Home Center kitchen shower should do so before February 7 They were also reminded that county dues should be paid before April

Mrs Dale Hiestand will serve as program committee chairman for the county convention which will be held November 4. She will be assisted by Mrs Florence Kreider, Mrs Harry Shonk, Mrs Evelyn Hess and Mrs Frances Souder

Three organizations were proposed as possible county projects for next year. They are LARCH, Goodwill Industries and the proposed Conestoga Cottage for Girls

Societies desiring to sponsor refreshment stands at the antique auction to be held at the Farm and Home Center on Memorial Day are asked to contact Mrs. Thomas Erb III, Lititz.

Hostesses for the next executive board meeting which will be held April 4 are Mrs. J. Clayton Charles and Mrs. Flossie Garber

BEEF UP

As a beef operator you're interested in maximizing your profit picture. You're looking for new ideas, new methods and new innovations that will help "beef up" your profit. Here's a program worth looking into. It's called "Van Dale Systems Feeding." It starts with maximizing your production of total digestible nutrients with increased haylage and silage. This permits the best use of your land and cattle coupled with a fully mechanized feeding system. Van Dale has the equipment and know-how for maximizing profits through mechanized feeding.

FORAGE BOXES

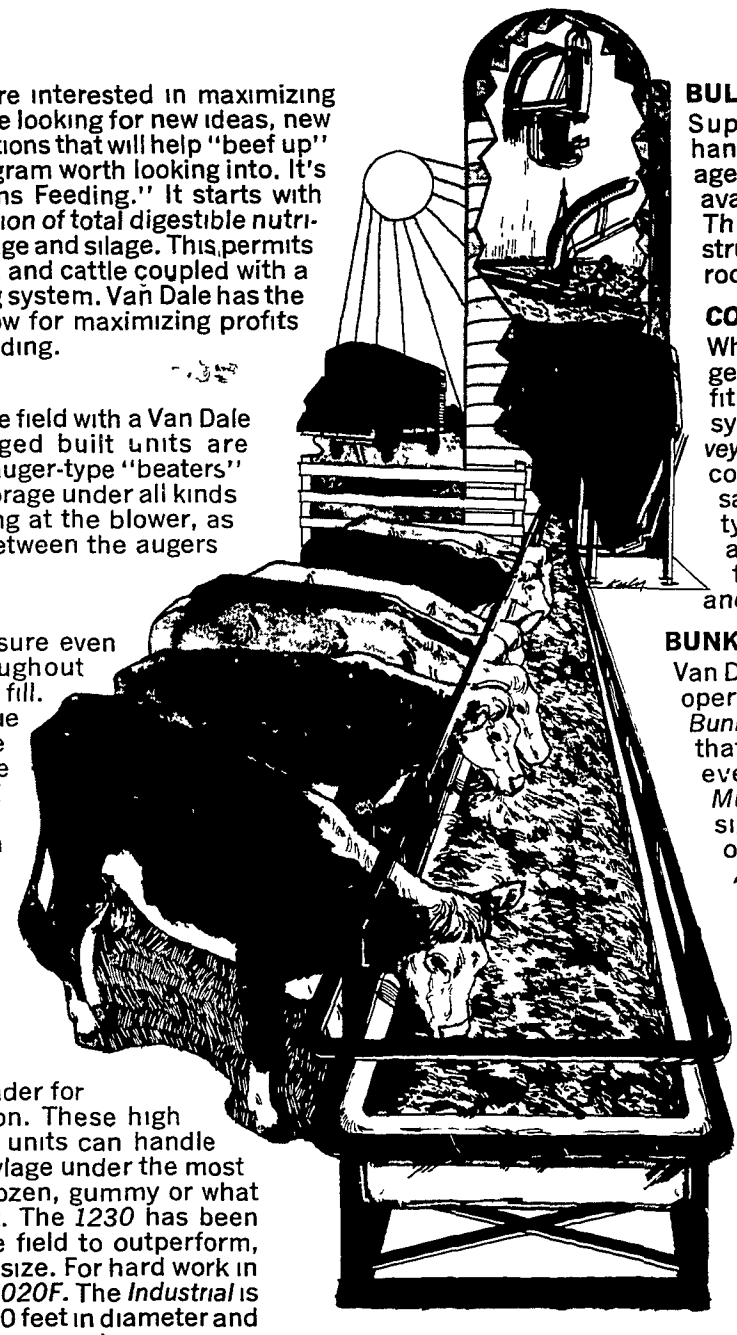
So let's bring it in from the field with a Van Dale *Forage Box.* These rugged built units are equipped with exclusive auger-type "beaters" that deliver all kinds of forage under all kinds of conditions. No clogging at the blower, as the forage is metered between the augers —not over the top!

SILAGE DISTRIBUTORS

Van Dale distributors insure even silage distribution throughout the silo for a maximum fill. The *1640 Power-Fil's* unique revolving deflector plate diverts the explosive force of incoming material and spreads it evenly in a continuous sweeping pattern to the wall. The *538* operates in an elliptical motion, directing forage to the outside walls of the silo Varied spout rotation speed allows for even fills

SILO UNLOADERS

There's a Van Dale unloader for every feeding application. These high performance twin-auger units can handle virtually any silage or haylage under the most adverse conditions . . . frozen, gummy or what have you, and do it fast. The *1230* has been customer-certified in the field to outperform, and outlast any make its size. For hard work in smaller silos there's the *1020F.* The *Industrial* is built for silos from 20 to 40 feet in diameter and has a capacity up to 40 tons per hour.



BULK STORAGE BINS

Supplementary feeds are easily handled with Van Dale's bulk storage feed bins. The *Super Stores* are available in 4½ or 7½ ton sizes. These units are fiberglas constructed. They won't rust, dent, corrode or absorb heat from the sun.

CONVEYORS

Whether straight-out, incline, auger or chain, Van Dale conveyors fit most any automated feeding system. The *SCC 1400 Chain Conveyor* is Van Dale's highest capacity conveyor. It handles all rations—safely. The *CT 200* and *300* auger type conveyors are adaptable to any feeding system. They're tough, efficient, easy to install and economically priced.

BUNK FEEDERS

Van Dale has a bunk feeder for every operation. The *SCF 1400 Traveling Bunk Feeder* is a single chain unit that will carry and feed virtually everything. The *Mammoth 14 Multi-Feeder* is an auger type designed especially for multi-lot operations. The *934* and *1234 Auger Bunk Feeders* are the sturdiest, smoothest operating, lowest cost feeders ever produced. Then, there's the stainless steel *Shaker Feeder.* A combination feeder and bunk designed for single-lot operations.

Van Dale Systems Feeding comes down to one word . . . efficiency. Van Dale offers various models and sizes of feeding equipment to most efficiently match the needs of every feedlot layout . . . old or new, large or small. Check with your Van Dale dealer to see what you need to maximize your profits. And ask him about Van Dale's new agri-leasing program.

Society 28

Farm Women Society 28 met recently at the home of Mrs Robert Book, Leola. Mrs. Velma *Hess served as cohostess at the meeting. Devotions were led by* Mrs. Norma Denlinger.

Mrs. Doris Thomas, Lancaster County Extension home economist, spoke on "The Nutritional Program in Lancaster County" during the meeting.

Mrs. Harold Rohrer, Lancaster County Farm Woman of the Year, gave a report on the recent state convention she attended as a delegate.

Plans were discussed for *members to entertain guests at Conestoga View on February 17.*

The next meeting of the group will be held February 24 at the home of Mrs. Harold Byers, 75 Hillcrest Avenue, Strasburg. Each member is asked to take a packaged box lunch which will be auctioned during the meeting.

Purina Dairy Conditioner Special can prepare cows for good production at low cost

If you're not among the many good local dairymen who have started mixing Purina Dairy Conditioner Special with your own grain to build a research-proved dry cow ration, it can pay you to check into this low-cost way of feeding dry cows.

Purina Dairy Conditioner is a 16 percent protein ration, fortified with extra Vitamins A and D plus phosphorus to help guard against milk fever.

To help you save on dry cow feeding, Purina Research recommends varying feeding levels, depending on cow condition and the quality of your roughages. For example, if a cow is in good condition and your roughages are of excellent quality, you would feed less Purina dry cow ration than if the cow were in only fair condition and if the roughages were of only fair quality.

*Reg. Trademark—Ralston Purina Co.

Using Purina Check-R-Mix* formulas we can build you a low-cost dry cow ration, combining Purina Dairy Conditioner with your grain. Or, if you're feeding low-protein roughages, it may pay you to feed Dairy Conditioner "straight" — just as it comes from the bag.

More and more successful area dairymen are proving that good dry cow feeding pays off in extra cow condition — and extra milk production in the next lactation For example, 100 to 200 pounds of additional body weight at freshening can pay off in 1,000 to 2,000 pounds of extra milk during the lactation.

Drop in soon and get your free copy of the Purina Dry Cow Program folder We'll be glad to point out how Purina Dairy Conditioner Special can help prepare your dry cows for good production at low cost.

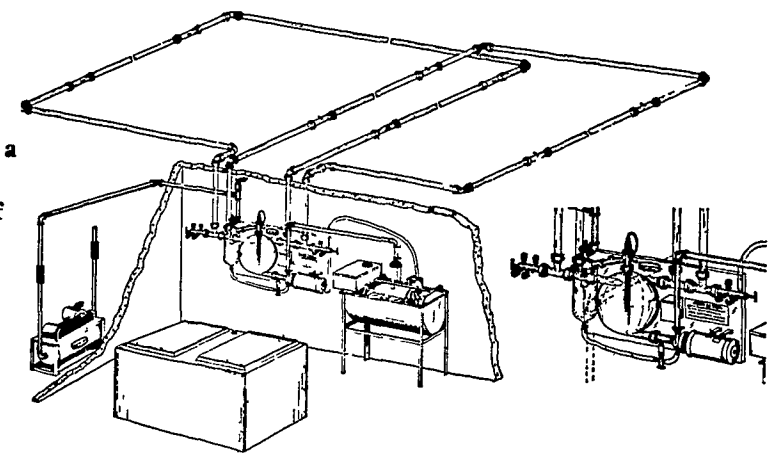
STA-RITE Can Put A Pipeline In Any Barn

WHY BUY A PIPELINE?

For An Average 40 Cow Herd
You Can . . .

1. Save walking 100 miles a year.
2. Save carrying 292 tons of milk a year.
3. Save 200 hours per year on an average herd.
4. Produce higher quality milk.
5. Increase your milk production.



WHY BUY A STA-RITE PIPELINE?

1. Engineered for the modern dairy farm of today as well as the dairy farm of tomorrow. Around the barn pipelines and milking parlors.
2. The only milkhouse control unit that is assembled at our modern new factory on a stainless steel panel. Pretested for trouble free operation, self-draining with patented washing features.
3. Built and guaranteed by Sta-Rite Industries, Inc., of Delavan, Wisconsin, a recognized leader in home water systems and agricultural components.

Smith Honored for 35 Years Here

(Continued from Page 1)

members who were attending their last 4-H meeting.

Smithe presented a table full of trophies to club members who had taken top awards in beef and sheep shows during the past year. The group was led by Donnie Dowart, Quarryville RD2, whose Angus steer was state 4-H grand champion at the 1972 Pennsylvania Farm Show. His animal brought the young 4-H'er more than $5,800 when sold for more than $5 a pound.

Also receiving trophies were: Elaine Herr, reserve Farm Show champion Charolais; Robert Hess, grand champion Farm Show Shorthorn; Karen High, reserve champion Farm Show Shorthorn; Kenneth Brubaker, reserve champion, a Charolais, at the district 4-H show.

Brubaker also had both the reserve champion individual and pen in sheep competition at the Farm Show. Elizabeth Herr had the grand champion pen of sheep, giving Lancaster County three of the top four 4-H sheep awards at the Farm Show this year.

Numerous other awards were given for showmanship and steer trios at various shows during the past year.

Max Smith presents the large trophy to Donnie Dorwart, Quarryville RD2, who had the grand champion 4-H Steer at the Farm Show this year. It was the 11th grand champion 4-H steer shown at the Farm Show by Lancaster County 4-H'ers since Smith came to the county 35 years ago to fill an Extension slot in livestock.

Wouldn't you rather keep your farm in the family than have it sold for taxes?

Planning your estate can help you avoid the unnecessary costs and heavy inheritance taxes that often require selling a farm intended for children and other heirs. But that's just one of the advantages of planning your estate to protect your family's future.

As a typical Lancaster County farmer, you're probably worth more than you realize and it's so important to plan your estate for handling by specialists. At the Friendly First, our trust officers, George Sload and Rick Ashby, are the experts who can help set up your estate for the best interests of you and your family.

Regardless of how little or how much you're worth, you'll get personal interest and plenty of time for discussion with a Friendly First trust officer. You can arrange a meeting at any of our branch offices . . . or even at your home . . . wherever and whenever it's most convenient for you.

Tragic losses can happen without proper estate planning. Don't let them happen to *your* estate. Call George Sload or Rick Ashby today to arrange a discussion that can be very valuable to you and your family. Call them TODAY at 397-4733.

Put your trust in the hands of the Friendly First.

Careful Management Pulled Them Through Local Marek's Disaster

Wengers of Stevens RD1 Convert Floor Pullet House to Cages

The Daniel E Wengers, Stevens RD1, believe that the very best care they can give is what it takes to get along in the local poultry industry

At 45, Wenger is a veteran pullet producer who survived the Marek's disease disaster in Southeastern Pennsylvania - an accomplishment which speaks for itself to knowledgable area industrymen

Wenger kept on producing pullets locally at a time when most local egg producers went south to areas like Georgia for their laying flocks

Now, Marek's has been solved with a new vaccine and Wenger has nearly tripled the size of his flock by converting to an automated cage system.

In the same building in which he produced13,000 pullets in a floor operation for the past eight years, he has just completed growing his first 35,000 flock of caged pullets. The pullets are moving out this weekend as replacement stock for the Plain and Fancy Egg Ranch, Inc , Elizabethtown RD3, managed by Claude Hess.

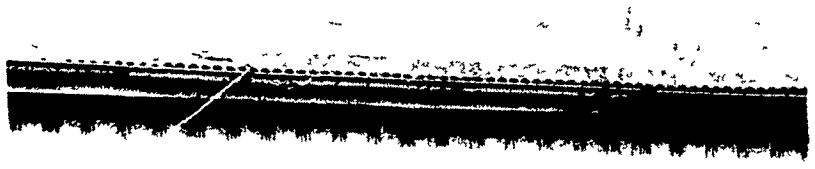
Hess had previously bought several flocks from Wenger and liked the quality of birds he got. It was eggs from the Wenger flock which took several top awards for Plan and Fancy at the Farm Show this year

In showing the flock early this week, Hess emphasized the uniform size and appearance of the birds produced by Wenger, as well as their thrify appearance. He said eggs from these birds also are uniform and superior in quality.

One of the keys to Wenger's success has been his ability to keep disease out of his flocks. He was able to maintain a good record on disease control even during the period since 1963 when most Southeastern Pennsylvania pullet producers were forced by Marek's to turn to other occupations.

This is the automatic equipment which feeds the birds at the Wenger poultry farm. A major concern with such a large number of birds under automatic feeding, watering, heating and ventilation is what to do in the event of a power breakdown. Wenger has a reserve power system which is designed to start automatically if power fails. He checks the stand-by system frequently to make sure it works.

Simplicity itself and a minimum of labor are the keys to Wenger's manure disposal syste. This covering at the ceiling of his manure catching area is removed and the manure pushed by power driven scrapers through the opening into a waiting wagon.



Wenger chats with Elwood Chronister, right, Windsor RD1. Chronister is considering converting his 16,000 bird floor operation to a 40,000 pullet cage operation. In the background at one end of Wenger's pullet house is the entrance to his manure catching area. The automatic scrappers push the manure through a hole in the roof to a wagon.

In keeping his flocks disease free, Wenger follows a program of completely washing down and sanitizing his building after each flock.

He also takes strict precautions to keep all birds and animals away from his pullets. For instance, he installs fine wire around all his vents to make sure birds can't enter.

He's equally concerned about visitors who might carry disease into the building and while the flock is growing visitors aren't welcome in the chicken house. This article was held up, for instance,until the flock was ready to move out.

Under the new cage system, manure is scraped out by a pulley system through a hole in the floor to a waiting wagon and hauled away every two weeks. This stops the build-up of ammonia.

Hess thinks this is one of the key reasons for Wenger's success. He thinks ammonia is very harmful to birds.

Looking back to the days when Marek's was prevalent, Hess noted that he once bought a flock that had had 40 per cent mortality as pullets and had another 40 per cent mortality before their laying career was ended. He emphasized that these birds were from "a good grower."

Wenger's worst set-back in the past eight years was about12 per cent mortality. But he usually grew out 98 per cent or better.

Hess thinks that Marek's was probably around before 1963 but it "really flourished when we started bringing together these large concentrations of birds." When local buyers "saw it was critical, they just scattered and went to other states to buy birds."

Hess thinks that one reason Wenger escaped Marek's disasters was that his farm is located among the trees and hills between the Circle—T Ranch and the Pennsylvania Turnpike. Marek's is primarily air transmitted and apparently didn't reach the Wenger farm. but Wenger's care and management was also an important factor.

Now that Marek's - "the only real problem we had in growing pullets," according to Hess - has been brought under control, Hess sees a bright future for pullet production in this area.

It was at the instence of Hess that Wenger converted his 40 by 400 foot pullet building to a cage operation last year. Hess helped Wenger in getting the new operation going and even agreed to take a flock at 14 weeks instead of the usual 20 weeks in order that Wenger wouldn't miss much production time. Wenger assembled all the equipment and was ready to go with the installation when the flock was moved. He converted the building in eight weeks.

Marek's isn't the only disease that Wenger keeps under control. "I haven't spent $200 for medication for the last four flocks," he stated.

Hess thinks it will be even easier to control disease with the cage system. He also noted they can't crowd and smother in the cages which have 23 birds per cage. In addition, there's more uniform size and health, which Hess thinks results in a more uniform and high quality egg.

(Continued on Page 17)

Mr. and Mrs. Daniel E. Wenger, Stevens RD1, are shown this week with their new cage poultry system. At upper left is a gas space heater, one of several which provide heat for the building.

U.S. Corn Projection

Farmers intend to reduce corn plantings by four per cent this year following a record crop of 5.5 billion bushels harvested in 1971, according to a special survey announced recently by the U.S. Agriculture Department.

The indicated planted acreage of corn in Pennsylvania is 1,447,000 acres, a one per cent decrease from 1971.

Wengers Convert Pullets to Cages

(Continued from Page 16)

By spreading overhead costs over a lot larger number of birds, cost per bird is also down. Labor costs per bird are also lower. There's more manure to handle, but Wenger's automated scraping system reduces this labor to a minimum

Wenger originally considered putting up a new building in order to convert to cages but the three dollars per bird cost discouraged him.

Hess emphasized that "every lab test we have had (from Wenger's past four flocks) have been MG - MS negative." This means the birds are free of CRD or PPLO organisms. These organisms or chronic respiratory disease move slowly through a flock and cut down on thriftiness. The result for the egg producer is a flock which is less efficient and produces inferior quality eggs. By keeping these respiratory diseases out of his flock, Wenger assures buyers of his pullets better results.

Hess stated, "Wenger's (MG - MS) negative tests show he's paying close attention to management." Hess thinks moving the manure every two weeks is important in stopping the formation of ammonia and other gases which are detrimental to the health of the birds, as well as in breaking the fly reproduction cycle.

Under his new system, Wenger grows the birds from day old to 20 weeks in 24 by 36 inch cages, 23 birds per cage. The only time the birds are handled is when they're debeaked at up to three weeks of age and when they're finally moved out.

While many producers are feeding 15 to 16 pounds of feed to get 20 week old birds, Wenger expects about 13 pounds on a full feed program

The cage system allows catching and loading 24 hours a day, while the floor system limits moving the birds to night time.

All in all, results with the first cage flock indicate a good thing has been made a little better.

Claude Hess, manager of the Plain and Fancy Egg Ranch egg production, admires a typical pullet at the Daniel Wenger farm. Hess likes the flock's uniform size and thrifty appearance.

Mrs. Snader Is Co. Farm Women Secretary

By Mrs. Charles G. McSparran
Farm Feature Writer

"Through Farm Women I've learned to do things I might not have done", says Mrs. C Leo (Anna Mae) Snader, secretary of the Society of Farm Women of Lancaster County.

Mrs Snader joined Farm Women Society 24 about eight years ago She served as chairman of the program committee, then vice president and program chairman two years, president two years and as chorister She is serving now on the creative arts committee with another member

Mrs Snader is in her second year as county secretary. It is her duty to record the minutes of the six executive board meetings each year, notify all members of the board meetings, make phone calls and write letters requested by the county president, record the minutes of the annual county convention and have copies made for all who attend the next convention.

Of Society 24 Mrs. Snader says, "It is a fun society, we like to do things for fun I enjoy Farm Women because there is a lot of things we have in common."

Some of their recent fun events were an anniversary dinner last year, a hockey game with their husbands, Emile's Hairdressing Academy to hear girls tell how to improve appearances and a ceramic show

Mrs Snader wrote the script for a mock wedding which the members had fun presenting for Farm Women county officers and another society, also for patients at Embreeville State Hospital.

Other entertainment they enjoyed at some of their meetings was having Mrs Joseph Beiler of Akron Mennonite Central Committee give a talk "Women Of Other Lands" and showing things from such places as Hong Kong, Taiwan, Palestine and Phillipines she and her husband visited They also heard about Red Cross work and plants of the Bible

Some of their creative projects were making florentine or flemished flowers, cracked marble lamp shades, candles, pine cone wreaths, to cover wire coat hangers, to decorate eggs and to do crewel work.

Some of their services have included going to Embreeville Hospital once a year, going to Conestoga View, sewing cancer pads and making bedside table Christmas ornaments for about 300 patients at Conestoga View.

Planning ahead, they are looking forward to knitting, sewing, having craft sessions, making Christmas decorations, entertaining, going to Elene's School of Charm, having a swim party, a family picnic, a Halloween party, taking their children bowling and having speakers at their meetings

Anna Mae is the daughter of Mrs John L Myer of Akron and the late Rev. Myer who died 10 years ago. He was minister and an elder of Mohler's Church of the Brethren, Springville He farmed their 96 acre farm. They had a dairy and practiced general farming, raising tobacco as a cash crop.

There were four daughters and no sons, so all the girls worked out in the fields Anna Mae helped plant and drive horses to cultivate the tobacco. Their father encouraged them in 4-H work All four had corn and tobacco 4-H projects and Anna Mae also had a pig project She learned to sew in 4-H also

Rev Myer was involved in soil conservation—going about talking to farmers about soil conservation practices when it was new in Lancaster County back in the thirties He sold insurance, was a school director and taught youth Sunday School classes and was involved in youth work and music Mrs Myer was a member of Farm Women Society 3

Theirs was and is a musical family. Three of the girls and their parents were choristers in church and 4-H The girls and their mother sang together. Three of the girls sang and played piano duets on radio programs.

Anna Mae sang alto in college and has sung in trios and quartettes. She now sings second soprano or first alto because she directed choirs and has been a chorister When Mrs Myer and the girls get together, they still sing Rev. Myer was in Ephrata Men's Chorus years ago. The next generation is now singing and taking music lessons.

Anna Mae attended Elizabethtown College, then was secretary and receptionist for Standards Brand Inc. on Water Street in Lititz. Later General Foods bought the building, then Campbell Soup Company used the warehouse as a receiving station.

Anna Mae and Leo lived near Rothsville one year after marriage and she worked at Sensenich Brothers at Lancaster Airport. After that she worked 15 years at Hamilton Watch Company.

Leo is the son of Mrs. David H. Snader who lives at Akron. His father, the late Rev. Snader, died in 1948. Besides being a minister he also had a small poultry farm.

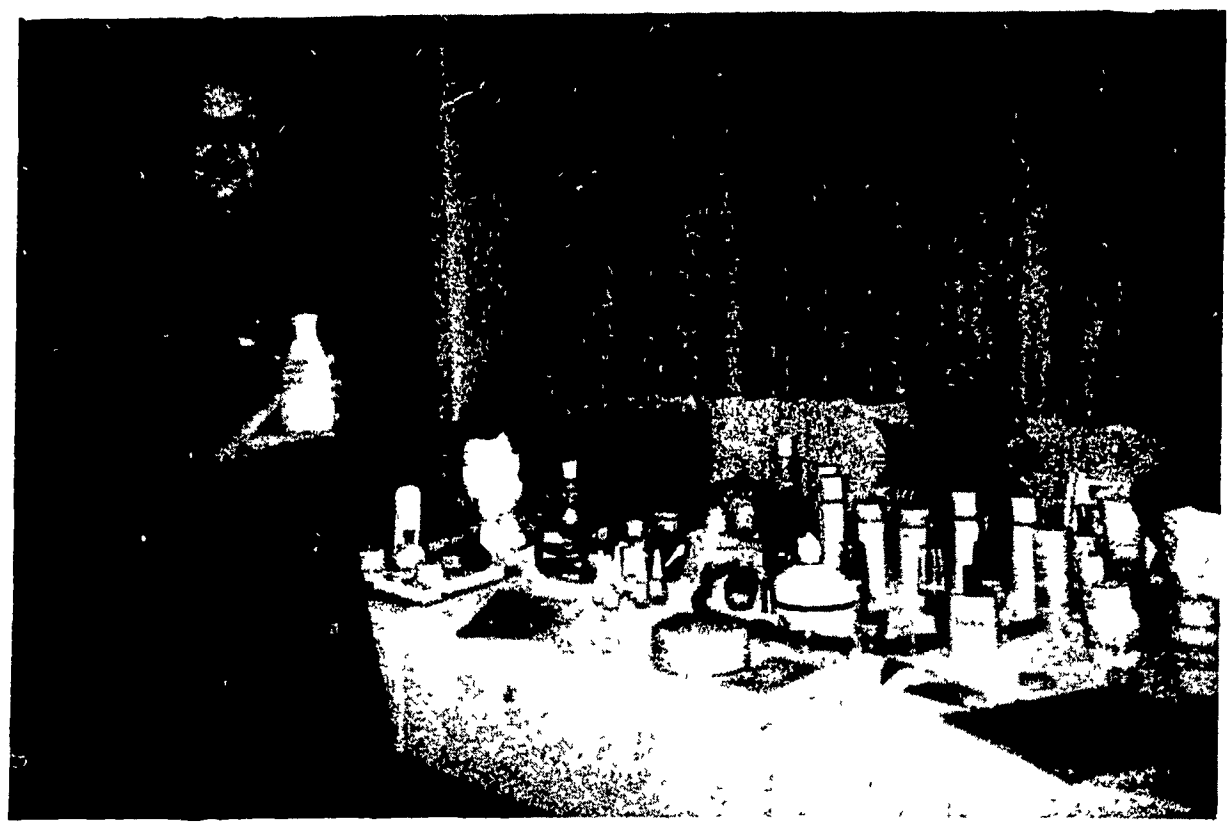
After Leo came from the service he farmed his mother's poultry farm for four or five years. They kept 1,500 layers. He then went to Hamilton Watch Company and served his apprenticeship and became a machinist.

Mr. and Mrs. Snader then bought a poultry farm near Ephrata. They kept approximately 8,000 broilers for five years, then switched to layers for five years and kept about 3,000. During this time Anna Mae, although working at Hamilton Watch Company, helped when necessary with the chickens.

Mr Snader quit raising chickens and became a sales representative for Victor Weaver of New Holland. He serviced stores in Philadelphia that bought poultry products from Weavers.

For the past six years Mr. Snader has been a sales representative in the Reading area for Kurtz Brothers Concrete, Inc. of Ephrata. They handle anything in the cement line, including cement, blocks, stone and precast cement. They live on Greentree Drive, New Holland RD2, about two miles south of New Holland.

Mrs. Snader is a cosmetic consultant. She sells and demonstrates Luzier Cosmetics They have make-up, lotion, wigs, in fact everything in the cosmetic line to be used from head to foot. These products are sold only through personal contacts and she makes appointments for demonstrations in the customer's home, but preferably has people come to her home studio.



Mrs. Sander has a full line of cosmetics in her studio and demonstrates the ones that make her customers look their best.

Mrs. C. Leo Sander, New Holland RD2, types the notices of county Farm Women executive meetings.

Snaders are members of Conestoga Church of the Brethren, Bareville. Mr. and Mrs. Snader have always been involved in church work and in music. Mrs. Snader did teach a senior high school Sunday School class and teaches adults sometimes. She is chairman of the Music and Worship Commission for the third year. They see that ushers are serving and co-ordinate worship.

The church of 500 members has four choirs and each has an organist or pianist and a director. Each choir sing one Sunday a month then the commission asks one of the choirs to sing when there is a fifth Sunday. Mrs. Snader was secretary of their Bible School two years and taught a junior high school class one year.

The church had a food stand at the Pennsylvania Farm Show in January. They sold 14,000 subs (400 dozen one day), ham, hamburger and hog dog sandwiches. They also sold pie, cake, coffee and ice cream. Anna Mae helped with the stand and always helps where there's a need at church.

Mrs. Snader was treasurer last

(Continued On Page 19)

Mrs. Snader says this jacket she is making if for Jeff and the other one is David's.

Mrs. Snader Is Co. Farm Women Secretary

(Continued from Page 18)

year of Summit Valley Elementary PTA. She went along on field trips and helped serve barbecues.

Snaders have two sons. Jeffrey was born October 12, 1962—on his parents' 16th wedding anniversary. David was born two years later on October 4. Both boys go to Summit Valley Elementary School in Eastern Lancaster County School District. Jeff started on the snare drum, is in church choir and was in Cub Scouts last year. Both boys like to draw.

Snaders own a three-apartment house at Ocean City, N.J. The whole family enjoys going there in June. They ride their bikes on the beach, walk on the boardwalk and hunt shells. They go to clean, paint and renovate the apartments, then rent them in the summer. Snaders go there for weekends whenever they can in the summer.

The whole family enjoys playing Crokinole, shooting pool and playing games together.

Mrs. Snader has a knack for sewing. She makes almost all her own clothes and made jackets for the boys recently. She does needlepoint, knits sweaters and is making a "Dutch tele" pattern afghan. She antiqued a nail keg which adds distinction to their living room decor.

She and her husband are do-it-yourself people. They refinish furniture and do their own painting. He caned chairs, laid carpet, wall paneled their basement and hung book shelves. He installed their stove top and dishwasher. He has a Shopsmith and makes some nice picture frames, then finishes them. He also teaches the boys to do things.

Mrs. Snader attributes Leo's handiness to living on the farm and learning to do for himself.

As for Anna Mae, she says, "I like to cook, I like to bake and I like to try new recipes. We like good food. Both os us enjoy eating tremendously." She still cans and freezes a lot of vegetables and fruits, even though they do not have their own garden.

When we think of February, somehow the tradition of that George Washington cherry tree story has brought with it the tendency to use cherries for desserts. Here are some of Mrs. Snader's, as well as some of her own favorites.

CHERRY SUPREME

1 can Lucky Leaf or Musselman's cherry pie filling
1 can Eagle Brand condensed milk
1 qt. Cool Whip
1 No. 2 can drained crushed pineapple

Mix all together, adding cherries last. Chill. Serve with a cookie or on top of angel food cake.

CHERRY DELIGHT

CRUST:

Rolll or grind one 8 oz box thin pretzels or pretzel sticks till they are like course nuts. Add 3 tablespoons sugar Melt 1 stick butter and ½ stick margarine Mix with pretzels mixture and press down on bottom of 9 x 13 inch pan. Refrigerate.

FILLING:

Cream one 8 oz package of cream cheese with one cup sugar Make up two envelopes of Dream Whip (2 packages) according to directions on package. Fold in cream cheese mixture. Spread over crust. Chill for 24 hours minimum. Day of serving—spread 1½ jars of Musselman's cherry pie filling on top of the other mixture. Refrigerate till ready to use 12-14 servings.

SOUR CHERRY MUSH

2 tablespoons butter
3 tablespoons flour

Stir until flour browns. Mix with sweetened cherries
1 qt. fresh sour cherries
1½ cups sugar (or sweeten to taste)

Chill. Serve with milk as dessert or serve as a side dish with meat

PINEAPPLE-CARROT SALAD

3 oz lemon jello
½ cup sugar
½ teaspoon salt
Juice from No. 2 can crushed pineapple and enough water for 1½ cups liquid. Heat juice to boiling and add to jello, sugar and salt
2 tablespoons lemon juice

Let completely set and whip. *Add·*

1 cup grated carrots
Pineapple
½ pint cream, whipped

COCONUT CUSTARD

1 unbaked pie shell (no bubbles in crust)
3 cups scalded milk
3 eggs, beaten
½ cup sugar
1 teaspoon vanilla
dash salt (⅛ teaspoon)
1 teaspoon cornstarch (level)

Add milk to remaining ingredients very slowly—stir until sugar is dissolved Cover pie dough with 1-3 cup coconut Add egg mixture Bake exactly 10 minutes at 450 degrees and lower to 350 degrees for 10 minutes

SHOO FLY PIE

(makes 9 inch pie)

1 cup flour
¾ cup dark brown sugar
1 teaspoon Crisco

Hold out 1-3 cup crumbs for topping

Mix remaining crumbs with: (leave lumpy)
1 beaten egg
1 cup molasses
¾ cup boiling water
1 teaspoon soda

Pour mixture into an unbaked pie crust, top with the crumbs and bake at 375 degrees for 10 minutes, lower to 350 degrees and bake 30 minutes

CRUMB CAKE

(three 8 inch layers)

Mix thoroughly, saving 1 tablespoon crumbs for each cake·

4 cups flour
2 cups sugar
¾ cups lard

Add
1 cup milk
1 teaspoon soda
¼ teaspoon cream of tartar
2 eggs
1 teaspoon vanilla

Pour batter into greased and floured pans Add crumb topping. Bake at 350 degrees for 25 minutes.

CELERY SEED DRESSING

1 cup granulated sugar
1½ teaspoons salt
1½ teaspoons paprika
1½ teaspoons grated onion
1 cup catsup and chili sauce (half and half)

Mix this all together

1 cup salad oil
½ cup vinegar
1½ teaspoons celery seed

Add to first mixture and mix well Can use electric mixer or blender

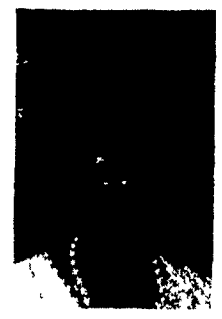
Ladies, Have You Heard?



Doris Thomas

By Doris Thomas,
Extension Home Economist

ToAbout Party Pears

Planning a Valentine's Day party? Or a celebration for Washington's Birthday or Lincoln's Birthday?

Pretty-as-a-picture Caramel Pears, pear shortcake, pear pastries, or any number of other delectable pear desserts will help make the occasion more festive.

But pears are so plentiful and reasonably prices this winter, the wise food shopper will certainly plan to use them for lesser meals of the month, too.

What a bountiful crop of winter pears have been harvested this season! According to the U.S. Department of Agriculture's Consumer and Marketing Service, the harvest is two million more boxes than last year and that spells good buys for the food shopper

Whether you select Anjou, Comice, Bosc or Winter Nellis, you can eat your pears as is or use them in a variety of ways from baking in a cake to including them in a salad, compote or garnish.

Peel ony if indicated in the recipes, since the skin is tasty and easily digested and will help hold in the succulent juices. Use moderate to low temperatures in cooking and baking.

And be sure to ripen green pears properly to assure they'll be most flavorful and juicy. To condition them properly, allow them to mellow at room temperature, away from heat or cold.

For youngsters, pears-on-a-stick make a great treat. They're easy to fix: melt caramel candies in top of a double boiler over boiling water. Insert a flat wooden skewer into the stem end of washed fresh pears, then slowly swirl the pear in the caramel sauce, spreading it with a knife to make sure the pear is entirely "hidden." Set pears upright in a waxed paper lined baking pan and refrigerate until the caramel is firm.

Looking for a sumptuous dessert for a splendid meal? Try **Pears Savoy**, a fruity, easy to eat and easy to prepare dish:

Preheat oven to 500 degrees (very hot), then wash, halve and core fresh pears. Place pears in baking pan; sprinkle with sugar, and place ½ teaspoon margarine in the cavity of each pear half. Place pears in oven until sugar is caramelized, about 15 minutes, basting with softened margarine as needed. Transfer pear halves to serving dishes and serve piping hot accompanied by a pitcher of heavy cream.

How to Handle A Flaming Frying Pan

A flaming frying pan is one of the most common types of fires in the home. It may result in serious burns or even the destruction of property.

If fire breaks out in a frying pan on your range, turn off the gas or electricity. Do not move the pan from the burner.

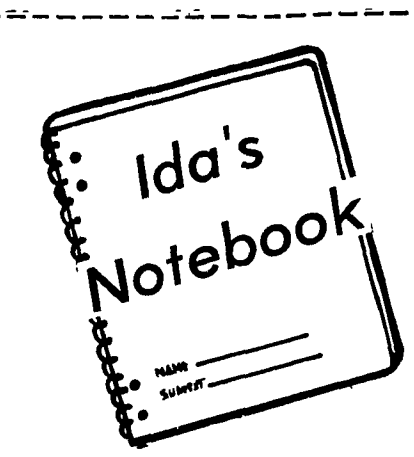
If a lid is handy, slide the lid over the top of the pan in a horizontal motion away from your body and smother the flames.

Do not lower a lid vertically down over the flames. This will cause the flames to spread sideways and perhaps burn your arm or ignite your clothing or other nearby articles.

If a lid isn't available, use salt or baking soda to smother the flame. Simply pour or throw either of these directly on the flame. But be careful not to push the grease and flames outside the pan.

Do not use flour, sugar or water. Flour will explode, sugar will burn and water will only push the fire out of the pan onto some other surface.

Remember these simple hints, but best of all have a good fire extinguisher handy in your kitchen.



Ida Risser

Now that the days are getting longer, it is no longer necessary to use the headlights on the car as we head for the first bus. And by the time the second one arrives, the sky is streaked with pink and red clouds as a new day begins.

The leaves of the first daffodils push through the grass as February arrives. And this year, I've planted a dozen red tulips around our mailbox to surprise the family.

But it will be a few weeks before they begin to stir.

xxx

Have you ever watched hen pheasants play? They really seem to play games.

I've often watched four or more of them run in circles under our evergreen trees. Then they will stop as though to catch their breath before running again in the opposite direction. Maybe this is just their way of exercising to keep themselves warm.

One of the funniest things I ever watched was two cockbirds "trying" to fight on a hill covered with ice-glazed snow. Every time they jumped at each other, the one slid 15 feet down the hill. But he didn't give up easily. Time after time he marched up the hill to claim his territory.

xxx

I've often heard folks who have moved into Lancaster County from other areas say the native people are "cold and unfriendly." Might it be that our ample supply of relatives nearby causes us to ignore the new neighbors.

While pondering these thoughts, I've also come to the conclusion that we really are a conservative group of people. Although this does not necessarily say we are all standoffish and aloof.

Holstein Breeders List Officers, Committees

The Lancaster County Holstein Breeders Association recently announced its complete list of 1972 officers and committees.

Elam Bollinger is president. Other officers are: Vernon Umble, vice president; Clyde W. Martin, secretary, and John M. Harnish, treasurer.

Other directors include: Paul Welk, Robert Book, Curtis Akers, Galen Crouse, and Arthur Wenger.

Those with special assignments include: Clarence Stauffer, state director; Robert Kindig, DHIA representative; Kenneth Rutt, news reporter; Jay Landis and Nathan Stoltzfus, sales representatives, and Robert Kauffman, advertising representative.

Committees and their members include:

Auditing — J. Mowrey Frey Sr, chairman, and Clarence Keener Sr.

Junior Project — Melvin Eby, chairman; Arthur Wenger and Paul Welk.

Banquet — Richard Hess, chairman; John Kreider and Clair Hershey.

Nominating — James Kreider, chairman, Henry Kettering and Lloyd Miller.

Barn Meeting — Albert Fry, chairman, Vernon Umble and Robert Book.

Field Day — Donald Eby, chairman, Galen Crouse and James Hess.

Black and White Show — Clarence Stauffer, chairman, Loren Zimmerman and Robert C. Groff.

Tour — J. Mowrey Frey Jr, chairman, Curtis Akers and Clyde Bucher

Sollenberger Cited

The Farm Family Life Insurance Company has announced that J. Wilbur Sollenberger is among the top 10 life producers for personal production in 1971 and is a member of the $750,000 club.

Sollenberger's interests include the PFA and the Jaycees. He is also an active member of his local church where he is a Sunday School teacher and a youth director.

Storm's "Eye"

The "eye" of a hurricane is the area in the center of the storm It varies in diameter from about seven to 20 miles Whereas the rest of the storm is violent, the eye has little or no wind and sometimes is clear enough so that sunshine or stars can be seen.

Save plenty on a big Chevy truck.

When the weather cools the deals get hot on Chevy medium-duty trucks. You can choose from two cab styles—conventional and tilt—with GVW's to 44,500 lbs. and GCW's to 60,000 lbs. And here's an important money saver at no extra cost: a 96" BBC on single-axle conventionals. Also available: tandems with a wide-range of axle ratios. It's your kind of truck, and you can own it now at your kind of price.

Help Us Serve You

Don't assume we know about your farm organization's meeting. To get your meeting on our Farm Calendar, it's safer to assume we don't know.

Remind us by calling 394-3047 or 626-2191 or by writing to Lancaster Farming, 22 E. Main St., Lititz, Pa. 17543. You'll be helping us to serve you better.

P.S. — If you're not sure you told us already, we don't mind hearing from you again.

WHY GRANDY GRANULAR APPLICATORS

BECAUSE IT'S ACCURATE-
Too much chemical is a waste you can't afford, too little won't be effective. Only GANDY gives you a money back accuracy guarantee in writing.
BECAUSE IT'S SIMPLE-
A GANDY box can be assembled or disassembled in less than a minute for easy cleaning and maintenance (if it ever needs any).
BECAUSE IT'S VERSATILE-
Whether you apply granules in 7", 10" or 14" band or full width, or sidedress when you cultivate, or put it under ground with fertilizer. Whatever your need in applying granules with any kind of equipment, GANDY has it.
BECAUSE IT'S RUGGED, HEAVY DUTY EQUIPMENT
that's built to give you year after year of satisfactory service

Come in and find out more about the all-new DISK MOUNTED GRANULAR HERBICIDE APPLICATOR in 8'-24' width.

We are stocking the popular models. The sooner you order the better our chances of serving you better.

AGRICO
Fertilizer & Farm Chemicals
Superior Products at competitive prices.
It's never to early to order AGRICO.

HYDRAULICS
Hydraulic installations for the farm and shop. Now stocking a line of popular:
- motors - pumps
- valves - cylinders - hoses

Don't forget our complete line of dairy supplies, animal health products, plow parts, mower parts, boots and rubbers, and tools.

FFA Record Book Winners Named

More than 50 awards were given at Pequea Valley High School Wednesday night in the annual project record book evaluation contest open to all Lancaster County FFA members.

The local winners are eligible for the state contest which is being held at Penn State.

Henry Givler, area agricultural consultant, said the contest winners are based on efficiency and accuracy of the records kept in connection with their individual livestock and crop enterprises undertaken as part of their FFA programs.

The judging was done under the Danish system with prizes of gold, silver and bronze eligible for state competition. None or more than one of each of these awards could be made in each class depending on the evaluation of the entries by the judges.

The winners by category included:

Seven Enterprises — Dave Bitler, Solanco, gold

Six Enterprises — Dale Weiler, New Holland, gold; William Hershey, Solanco, silver; John Miller, Manheim Central, silver.

Five Enterprises — Rick Pfautz, Ephrata, gold; Russel Kline, Ephrata, silver; Ray Martin, New Holland, silver.

Four Enterprises — Dale Nolt, Manheim Central, gold; Amos Sauder, Manheim Central, silver; Wayne Kreider, Solanco, silver; Joe Lefever, Manheim Central, silver; Richard Bollinger, Ephrata, bronze, Ken Groff, New Holland, bronze; Delmer Weaver, New Holland, bronze.

Three Enterprises — Mervin Groff, Manheim Central, gold; J. Marlin Becker, Manheim Central, gold; Nelson Weaver, Ephrata, silver; Charles Neff, Pequea Valley, silver; Earl Breneman, Penn Manor, silver, Donald Wenger, Manheim Central, bronze; Ken Dearolf, Solanco, bronze; Clyde Dearolf, Solanco, bronze.

On-Farm Work Expierence — Adolph Bensinger, Solanco, gold; Irvin J. Boll, Manheim Central, silver; David McMichael, Solanco, silver; Lamar Long, Garden Spot, bronze; Fred Edwards, Solanco, bronze; Mervin Keener, Solanco, bronze; Hobert McMillion, Solanco, bronze.

Pennsylvania Farm Account Book — Robin Ginder, Ephrata, gold.

Chapter Scrapbook — Grassland, gold; Manheim Central, silver; Penn Manor, bronze; Solanco, bronze.

Forages Workshop Set

A special workshop on forages for livestock and dairy farmers has been scheduled Friday, February 18 at the Farm and Home Center.

Reservations are being asked by Friday, February 11. Cost for lunch and handout materials is $4. Reservations can be made through Arnold G. Lueck, associate Lancaster County ag agent.

Crops and Soils Day Set

The annual Lancaster County Crops and Soils day is scheduled in the auditorium of the Farm and Home Center Tuesday, February 22.

The all day program will include small grains, corn, weed control, forage, fertility and related information. Emphasis will be on recommendations and practices by the Agriculture Extension Service for the 1972 growing season.

Agri-business companies and their representatives will have displays and exhibits.

WE RE-EARN OUR LEADERSHIP EVERY YEAR

Each year the Producers of Funk's G-Hybrids set the standard for innovation and quality in the seed industry. New and better hybrids, developed by the world's most productive hybrid research team, provide you with seed which is high in yield and profit potential.

We earn our reputation in farmers' fields . . . the toughest proving ground of all. And, each year you and your neighbors show your confidence by planting more and more acres to Funk's G-Hybrids.

The Funk's-G symbol stands for unmatched quality and dependability.

Funk's G-Hybrids: Dependable Hybrids from Dependable People.

The outstanding performance potential of Funk's G-Hybrids for silage has been repeatedly proven by the Pennsylvania Agricultural Progress Days Silage Competition, where, for a consecutive number of years, they have consistently received the top honors.
